TERMS—Cash with order with crates returned to us at our expense. We are booking orders for February, March and April farrow now. Some prefer pigs at 2 weeks old and they do well raising them. We sell them from 2 weeks of age up to any size and age.

Good Business.

Tell me of a better business than to buy 6 or 8 baby pigs, grow them to maturity and sell them with their litters or to sell one sow with her litter and have the rest with their litters for your trouble and expense. When more than one pig is ordered we get \$1.00 per head extra for each sow pig more than half the number bought. You can sell your boar pigs as easily as the sow pigs and for as good a profit and so can we but we do this to keep the flock about half and half so as to be able to supply the trade for some want all sow pigs and if we do not keep them about even we are apt to have NO sows left.

Money in Hogs.

The government report Shows that a pure bred hog can be grown to maturity on 2-3 the feed that it takes to feed another not pure bred. So, then, 20 bushels of corn will go as far in a PURE bred hog as 30 bushels will feed to a common grade hog. So it is business to get into the pure bred hog business. Everything looks favorable to a great money-making time in hogs the next two years. When did you see so great a spread between the price of hogs and corn as there is today. For the money invested there is MORE MONEY IN HOGS NOW than there has ever been according to feed prices and it is BUSINESS to get in now and get part of it.

ORDER YOUR WANTS EARLY. Bred gilts and sows for sale NOW. Ask for prices.
